

## THE BIG SHOW (continued)

### Sailfish Boats

While Sailfish Boats' new 226 DC may be the smallest dual console in the company's fleet, the 23-footer plays like a runabout but fishes like an open-water champ. The 226 DC (23' LOA, 8' 6" beam) is built using the company's Sailtech manufacturing process and is based on a Variable Degree Stepped (VDS) hull for improved performance and stability. Equipped with a 21-gallon livewell, insulated storage under each seat, full wraparound windshield, and plenty of seating, power options up to 200 horsepower are available from Mercury, Yamaha, or Suzuki. With a 200-hp Suzuki on the transom, the 226 DC had a top speed of 42.3 mph and range of 390 miles cruising at 25.6 mph. [sailfishboats.com](http://sailfishboats.com)

### Reina Boats

Reina Boats is making the world debut of its new "Houseyacht" line with the Reina Live L44 DR offering 448 square feet of stylish living space. The main deck features two comfortable staterooms and a head, along with a U-shaped galley, salon, and dining area with floor-to-ceiling windows. A wide staircase leads to a large upper deck ideal for sunbathing, dining, or entertaining. Built to CE Class C certified, ABYC, and U.S. Coast Guard standards utilizing marine-grade aluminum and a catamaran-style hull, the Reina Live L44 DR (47' LOA, 15' 10" beam) is designed both for cruising adventures and marina life. With twin 125-hp outboards, the Houseyacht has a 300-mile range cruising at 8 knots. [reinaboats.com](http://reinaboats.com)
