

SAILFISH 232 CENTER CONSOLE

Sailfish Boats, based in Cairo, Georgia is a boat builder that has focused on delivering Practical, Purposeful, Powerful boats for more than 35 years.

Sailfish Boats recently announced its latest model, the 232 Center Console. The Sailfish 232 boasts an array of innovative features designed to enhance every aspect of your on-water boating experience. From the convenience of port and starboard transom entry points, to the versatility of twin 10-gallon livewells tucked beneath the rear bench seat, every detail has been carefully crafted with the modern boater in mind.

From the integrated full-height windshield built into the T-top frame, to the bow seating with built-in chaise backrests, every detail exudes quality, comfort and ease of use for a day of fishing or just enjoying the day on the water. With head access from the front of the console, complete with a standard porta potti head, pump-out optional. Equipped with a 108-gallon (45.4 L) fuel tank – the largest in its competitive set – and a transom Baja beach cooler for easy access to refreshments when hanging in the water, the 232 ensures that your adventures continue uninterrupted. Additional features, such as the standard 65-quart Engel hard side carry-on cooler with slide out tray beneath the leaning post, provide ample storage for all of your essentials.

Options include features such as a reversible leaning post that can face aft, single Garmin 1243 GPS screen, or the entertainment package, including a retractable ski tow pylon, fusion transom remote and Hella™ underwater lights to further enhance your boat and

SAILFISH BOATS IS EXCITED TO EMBARK ON A NEW ERA OF BOATING EXCELLENCE WITH THE 232 CENTER CONSOLE.

boating experience.

While the 232 CC prioritizes comfort, it does not lack in the performance department. Like all Sailfish models, the 232 sits on the revolutionary VDS hull design, delivering unmatched stability, agility and efficiency on the water. This innovative three-hulls-in-one platform offers an ideal blend of stability and performance, whether navigating calms waters or powering through choppy conditions. The deepest “step” features a steep 24-degree angle, expertly designed to slice through the water with remarkable ease, ensuring a smooth ride. Positioned slightly shallower at 23-degrees, the second surface facilitates easy airflow under the hull, reducing friction and maximizing fuel efficiency. Finally, the outermost stepped surface, set at a flatter 22-degree angle, enhances stability when the boat is at rest. In practical terms, this means passengers will not experience that dreaded rocking feeling, even after a long day on the water.

Sailfish’s Sailtech construction process enhances the already impressive ride characteristics of the VDS Hull. Combining a strong building philosophy and premium materials like Kevlar®, carbon fiber, quad-axle fiberglass mat, Prisma® beams on the underside of the deck and Trevira®. Sailtech delivers the next-level strength, quality and durability to stand out from the rest. With Sailtech, boaters can relax and enjoy the quality of the build and comfort knowing that they are aboard one of the most secure models on the market. Standard power is 200HP or choose the optional 250HP motor from Mercury, Yamaha or Suzuki engines, ensuring top performance both new or seasoned captains alike.
